

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A security paper for producing value documents, ~~such as bank notes, checks or the like, consisting of~~ including a creasable, multilayer substrate comprising at least one paper layer coated with film on both sides all over, characterized in that at least the film is equipped with at least one security feature.
2. (Previously Presented) A security paper according to claim 1, characterized in that the paper layer is interrupted.
3. (Currently Amended) A security paper according to claim 1 ~~or 2~~, characterized in that the security feature of the film is selected from a printed image, diffraction structures, a metallization, luminescent substances, thin-film elements, liquid crystals, magnetic pigments, thermochromic substances, photochromic substances and dyes.
4. (Currently Amended) A security paper according to ~~at least one of claims 1 to 3~~ claim 1, characterized in that the security feature is a printed image executed by intaglio printing.
5. (Currently Amended) A security paper according to ~~at least one of claims 1 to 4~~ claim 1, characterized in that in the case of a plurality of films, they have different stretch.
6. (Currently Amended) A security paper according to ~~at least one of claims 1 to 5~~ claim 1, characterized in that the security paper ~~consists of~~ comprises annual

fibers, ~~in particular cotton fibers.~~

7. (Currently Amended) A security paper according to ~~at least one of claims 1 to 6~~claim 1, characterized in that the security paper ~~consists~~ comprises at least partly of synthetic fibers, preferably polyamide fibers.

8. (Currently Amended) A security paper according to ~~at least one of claims 1 to 7~~claim 1, characterized in that the paper ply is equipped at least with a security feature.

9. (Currently Amended) A security paper according to ~~at least one of claims 1 to 8~~claim 1, characterized in that the security feature in the paper ply is a watermark.

10. (Currently Amended) A security paper according to ~~at least one of claims 1 to 8~~claim 1, characterized in that the security feature of the paper layer is selected from a security thread, printed image, diffraction structures, a metallization, luminescent substances, thin-film elements, liquid crystals, magnetic pigments, thermochromic substances, photochromic substances and dyes.

11. (Currently Amended) A security paper according to ~~at least one of claims 1 to 10~~claim 1, characterized in that the security features of at least one of the paper layer, the film ~~and/or~~ further layers are applied or incorporated in register.

12. (Currently Amended) A security paper according to ~~at least one of claims 1 to 11~~claim 1, characterized in that the security features of at least one of the paper ply, the film ~~and/or~~ further layers are applied or incorporated such that they complement each other to form total information.

13. (Currently Amended) A value document ~~such as a bank note, check or the like,~~ characterized in that the value document has a creasable substrate according to ~~at least one of claims 1 to 12~~claim 1.

14. (Currently Amended) A method for producing a creasable security paper according to ~~at least one of claims 1 to 12~~claim 1, characterized in that
- a) at least one paper layer is produced in a paper machine, and
 - b) then film is applied to both surfaces of the paper layer all over, the film being already equipped with at least one security feature or equipped therewith after application.
15. (Previously Presented) A method according to claim 14, characterized in that the film is printed after application.
16. (Previously Presented) A method according to claim 15, characterized in that the printing process is intaglio printing.
17. (Currently Amended) A method according to ~~at least one of claims 14 to 16~~claim 14, characterized in that the film is cold-laminated on the paper layer.
18. (Previously Presented) A method according to claim 17, characterized in that a water-soluble laminating adhesive is used in cold lamination.
19. (Currently Amended) A method according to ~~at least one of claims 14 to 16~~claim 14, characterized in that the film is extruded onto the paper layer.
20. (New) The security paper of claim 1 wherein said value documents are bank notes or checks.
21. (New) The security paper of claim 6 wherein said annual fibers are cotton fibers.
22. (New) The value document of claim 13, comprising a bank note or check.
